

In Showrooms –

Dealerships looking to dress up their showrooms need not look any further than *The Auttoman*®.

Sure, it's a great piece of furniture around which customers can sit and discuss the merits of buying of a new car, or even sign the papers on their new purchase.

But the *Auttoman*® can also be a valuable tool in the sales arena. Dealerships can choose to cover *The Auttoman*® with a number of different fabrics, giving their customers a chance to see and feel all of their interior options before ordering. And the wheel in the center of *The Auttoman*® can be used to highlight a special wheel-of-the-month or to simply show customers additional wheel options.
